I've requested a copy of the emission documents. We had a good discussion on OB/OD risk issues, although, it would have been nice to have our risk people on the call (but their usually too busy). I've attached the notes from the call...

(See attached file: Subx)

Mike, do you have the documents (or access to them?) Also, I'm interested in hearing about the discussion on the call today. I wanted to call in, but was just scheduled too tightly today. Thanks.

Subject: emission factors

FYI (see below). If anyone in the workgroup is interested in reviewing the OB/OD emission factors developed by CCS and doesn't have access to the documents please contact Bev Rikala.

Subject: emission factors

In case you haven't been getting notices, I wanted to call your attention to the OB/OD emission factors that have just been posted on the website for the governmental coop working group. This is the website that was set up by Sandia after the meeting in Albuquerque. The posting asks for comments on the EFs. The EFs were developed by Bill Mitchell, working with Chemical Compliance Systems (CCS). There is a caution against sharing the data, because at this point it's a product of CCS, but peer review by regulators is OK.

China Lake has proposed using these EFs, which is why I am trying to get you all involved. If you don't have access to the documents, please reply to me and I can forward them. Thanks,
